MODLIGHT ILLUMIX SLIM & CLASSIC PRO RGBW

Illumination and status display – two functions in one device

In the ever-evolving world of industrial lighting, there is an impressive innovation that is revolutionizing the way machines and work areas are illuminated and monitored. The Modlight Illumix Pro RGBW LED machine lights are at the forefront of this change, as they not only provide efficient lighting, but also serve as a versatile status indicator.

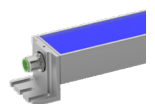

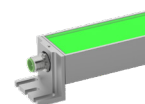

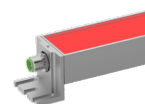

Until now, the requirements for industrial lighting and status displays were considered separately. Machine lighting should ensure optimum lighting conditions, while status indicators are specifically designed to communicate important information. But Modlight Illumix Pro RGBW combines these two functions in a single flexible device.

STATUS DISPLAY

Red –
on/off

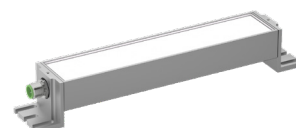

Green –
on/off

Blue –
on/off

LIGHTING

White – on/off

BENEFITS

Flexibility:

- Combination of lighting and status status display in one device
- Status display has priority
> White lighting is switched off
- Illumination of the work area with energy-saving LED technology
- Status display in the direct field of vision of the employee
- Illumination of complete work areas with status information

Economical:

- Status information can be immediately recognized immediately
- Reduction of downtimes

Energy efficiency:

- LED technology is generally energy-efficient, which leads to a reduction in energy consumption and operating costs

Longevity:

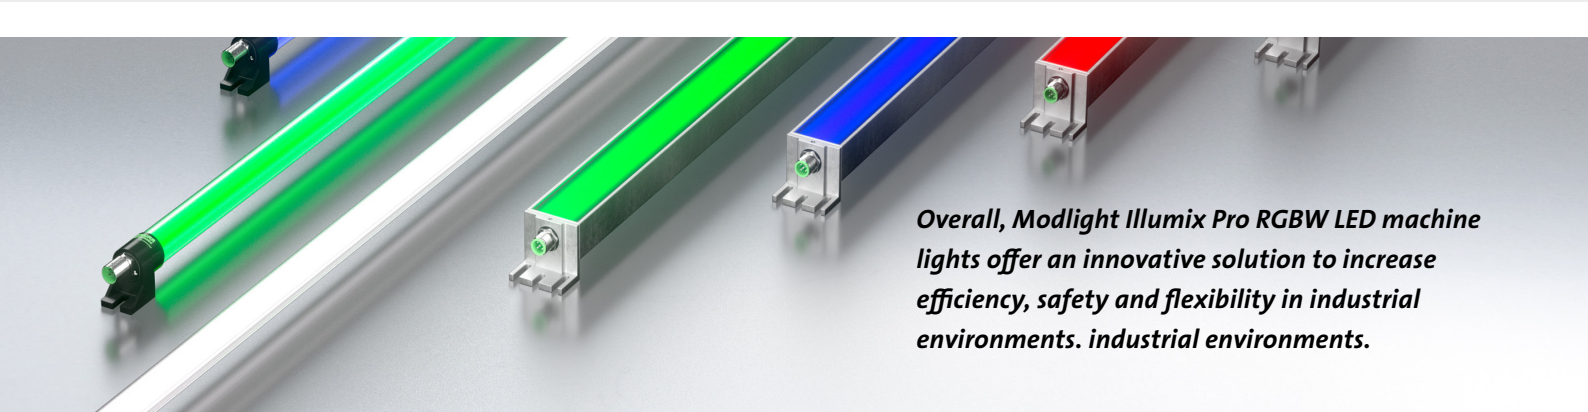

- LED lights have a long service life and require less frequent replacement of light sources

Immediate switch-on:

- LEDs reach their full brightness immediately, without the need for a warm-up time

Environmentally friendly:

- LED lights contain no harmful mercury vapors and produce no UV radiation, which makes them more environmentally friendly.

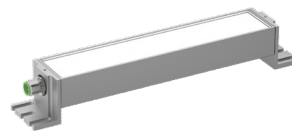

Overall, Modlight Illumix Pro RGBW LED machine lights offer an innovative solution to increase efficiency, safety and flexibility in industrial environments. industrial environments.
